

## BAMTEC<sup>®</sup> EVOLUTION: THE NEW GENERATION

BAMTEC<sup>®</sup> is the most advanced solution for rolled reinforcement – since over 20 years.

With the decision to put **progress** Maschinen&Automation in charge to manufacture the entire BAMTEC<sup>®</sup>-plant, the newly developed and constructed machine comes with a wide range of advantages for rebar-fabricators:

- **Fully-automated and extremely flexible:** up to 6 coils with wire from 6mm to 20mm
- Designed for a **1-man operation** to produce **tailor-made and pre-fabricated** BAMTEC<sup>®</sup>-carpets
- **Fewer coil changes thanks to 5 ton-coils** addressing the trend to heavier coils
- **Approx. 30 % less space requirements**
- New software for the acquisition and evaluation of production data. With *Stabos*, the quality and productivity of the plant can be increased. In addition, *Stabos* significantly simplifies maintenance planning
- **Strongly increased performance**
- **Price-performance ratio significantly improved**
